

SYRACUSE UNIVERSITY

MAT 414

Introduction to Ordinary Differential Equations

2017-2018

(3 credits)

Faculty: Dan Zacharia, Ph.D., Professor, Department of Mathematics

Administrative Contact: William R. Newell, Associate Director, Project Advance

MAT 414 is a first course in the study of differential equations. Topics covered include: the analytic and qualitative aspects of first-order differential equations (linear and nonlinear), second order linear equations, Laplace transforms, and systems of first-order linear equations.

Prerequisites

To register for this course, students must provide documents confirming completion of the following prerequisites:

1. Passing Syracuse University MAT 295 and 296 with a grade of C- or better; or
2. Earning a score of 4 or better on the AP BC calculus examination; or
3. Earning a qualifying score on University examinations

and

1. Passing MAT 397 with a grade of C or better

Students are expected to be able to:

- Take partial derivatives;
- Set up and evaluate integrals;
- Do integration by parts; and
- Work with elementary linear algebra
