

SYRACUSE UNIVERSITY

ACC 151
Introduction to Financial Accounting
2020-2021
(4 credits)

*Faculty: Karen Kukla, Adjunct Professor; Lubin School of Accounting,
Martin J. Whitman School of Management*
Administrative Contact: Eric Young, Senior Associate Director, Project Advance

Accounting 151 is an introductory course offered at the Syracuse University Martin J. Whitman School of Management. Students taking this course should have an average grade of “B” or better in high school math courses and be recommended by their high school math or business instructor.

Accounting 151 introduces the student to financial accounting concepts that aid entrepreneurs, managers, investors and creditors in planning, operating and analyzing a business. Emphasis in this course is on the interpretation of financial statements.

In addition to the use of a traditional textbook, lectures, quizzes and exams to deliver basic accounting skills, students are required to complete a comprehensive project that demonstrates their ability to analyze the financial statements of publicly traded companies and make an informed investment decision based on the analysis.

By the end of the course, students are expected to understand the basic accounting information system, have the ability to read and understand a set of basic financial statements, have awareness of the current issues in financial accounting and their impact on organizational stakeholders, and understand career opportunities available to accounting graduates.
